

**Madhuri Lad, DO, FACOI, AAHIVM**, as Assistant Medical Director of the Internal Medicine Specialty Services Ryan White Clinic, I am part of a multidisciplinary team for treatment of patients living with HIV in eastern Oklahoma. Oklahoma has been designated as one of the seven states with a high rural burden for ending the HIV epidemic. My experience includes telemedicine and providing care to these rural areas in eastern Oklahoma. I presented my program with rapid start of antiretrovirals for patients living in Oklahoma at the 2020 National Ryan White Conference and have qualified for the HRSA Best Practices Target HIV website for both these rapid start and telemedicine programs. I am the facilitator for the OSU HIV and Viral Disorders ECHO (Extension for Community Healthcare Outcomes). I also received my certification for the treatment of HIV from the American Academy of HIV Medicine and have been certified for 6 years.
